

REVIEW OF THE FOREIGN SCIENTIFIC CONSULTANT TO THE RESULTS OF NATALYA S. SALIKOVA SCIENTIFIC INTERNSHIP

TO WHOM IT MAY CONCERN

This letter is to act as an official review of scientific training for **NATALYA S. SALIKOVA**, Associate Professor, PhD in Chemical Science, of the Department of Ecology, Life Safety and Environmental Protection of the Abay Myrzakhmetov Kokshetau University, 189A, Auezov Street, Kokshetau, 020000 Kazakhstan, passport number N07384279 (issued 04/22/2011), which was held at the Universitat Politècnica de València (UPV) from September 14th – December 24th 2020.

The Scientific Training at the Hydraulic and Environmental Engineering Department of the Universitat Politècnica de València was developed in full accordance with the Individual Work Plan of **NATALYA S. SALIKOVA**. The activities developed during the internship were focused on the following topics:

- The study of modern methods of analyzing the quality of surface waters on the basis of scientific training
- The study of new theoretical, methodological and technological achievements of foreign science in the field of assessing the quality of natural waters
- A review of EU standards in the field of surface water quality assurance
- The interpretation of the results of scientific research obtained on the basis of modern methods of analysis and forecast
- A review of foreign scientific publications in the field of assessing the quality of natural waters
- Search, collection, processing, systematization and analysis of information on the research topic “On the need to improve the integrated assessment system of natural waters quality in Kazakhstan”

In this period, there was time to discuss the possibilities of publications in foreign scientific journals of high impact factor and planning for further work, taking into account the expansion of the environmental aspects of the scientific work. As a result of the internship, a research scientific paper is expected to be published on a high impact indexed international journal in the next weeks.

Valencia, December 24th 2020

Javier Rodrigo Ilarri, PhD.
Professor of the Hydraulic and Environmental Engineering Department
Polytechnic University of Valencia
